01 — THE PROBLEM

Ministry data is fragmented and manual

> Every week, a campus youth pastor stitches together data from Planning Centre, a per-campus Google Sheet, and a combined state spreadsheet. New people details are copied by hand from a Google Form. Pastoral health reviews happen informally, if at all. New Christian discipleship steps are tracked separately. The people doing ministry spend more time moving data than caring for youth.

02 — THE SOLUTION

One system, one source of truth

A purpose-built web application that replaces the Google Sheets workflow. Leaders enter data once. Pastors see it immediately. New people scan a QR code and their details feed directly into the pipeline — no manual copying. End-of-term reviews appear automatically in each leader's portal when the pastor opens the review period. The dashboard computes everything.

Planning Centre continues for service scheduling and roll-call. One attendance number per week is manually entered here. Everything else lives in this system.

03 — USERS & ROLES

Two roles, deliberately simple access

Youth Leader

- Selects campus + name to access (no login)
- Sees their youth roster, pre-loaded by pastor
- Marks expected attendance weekly
- Views their allocated new people + NCs
- Can manually add NP/NC entries as fallback
- Completes end-of-term reviews in their portal
- Maintains pastoral care sheet per youth

Youth Pastor

- Selects campus + name to access (no login)
- Adds leaders and builds their youth rosters
- Manages NP pipeline + NC pathway (assigns leaders)
- Can also input/reassign NP and NC
- Enters campus weekly stats
- Opens and closes end-of-term reviews
- Views full stats dashboard

Authentication is name-select — leader picks campus then their name. No passwords, no magic links. End-of-term reviews appear in the leader's normal portal when the pastor opens the review period; no special URL needed.

04 — YOUTH HEALTH CATEGORIES

Four categories, set at end of term

Every youth on a leader's roster is assigned a pastoral health category during the end-of-term review. This is the key health metric of the ministry — not just who's attending, but where they are in their journey.

1 — HIGHEST	2	3	4
Contributor	Connected	Community	Archived

Contributor — actively serving in some capacity. The deepest level of engagement. Youth who are invested enough to give, not just receive.

Connected — well connected into the program and to people. Relational depth, regular presence. More than just attending.

Community — attending but more loosely connected. Regular enough to know, but not yet embedded. The main entry category for new activations.

Archived — no longer active. Retained on record but removed from active reports and listings.

New youth default to Community on activation. Category changes are made during the pastoral review, not

New youth default to Community on activation. Category changes are made during the pastoral review, not week-to-week. The key dashboard stat: distribution across Contributor / Connected / Community per leader and per campus.

05 — PASTORAL CARE SHEET

Discipleship milestones per young person

Each youth on a leader's roster has a pastoral care sheet — a simple record of their key discipleship milestones. The leader maintains this; it's always visible alongside the youth's name and category.

💧

Water Baptism

Baptised? Yes / No, with date when known.

🔥

Holy Spirit Baptism

Baptised in the Holy Spirit? Yes / No, with date.

🙌

Serving

Are they serving? Yes / No, and in what role.

These fields sit on the youth_roster record. They can be updated at any time — not just at end of term. A youth who gets water baptised mid-term should have that recorded the same week. These fields feed into the dashboard stats (e.g. % of roster water baptised per campus).

06 — END-OF-TERM REVIEW

Pastor opens it — leaders complete it in their portal

At the end of each term, the pastor clicks "Open Term Review" on their dashboard. This unlocks the review section in every leader's portal on the campus. Leaders log in the normal way (campus + name select), see a "Term Review" section, complete it, and submit. The pastor sees results collate in real time. When done, the pastor closes the term.

What each leader sees in their term review

AUTO-GENERATED TERM STATS (READ-ONLY)

NEW PEOPLE ADDED

e.g. 4 this term

From their NP allocations

ATTENDANCE AVERAGE

e.g. 7.2 / week

From their weekly entries

EXPECTED AVERAGE

e.g. 8.5 / week

From their Yes counts

ATTENDANCE RATE

e.g. 85%

Attended ÷ expected

ROSTER CHANGE

NP CONNECTED

e.g. +2 this term

Start vs. end of term

e.g. 3 of 4

From NP review below

LEADER FILLS IN

- Per youth: update category (Contributor / Connected / Community / Archived) + write pastoral comment
- Per allocated new person: connection status + notes
- Per allocated new Christian: NC step updates (baptism, bible, Fresh Start)

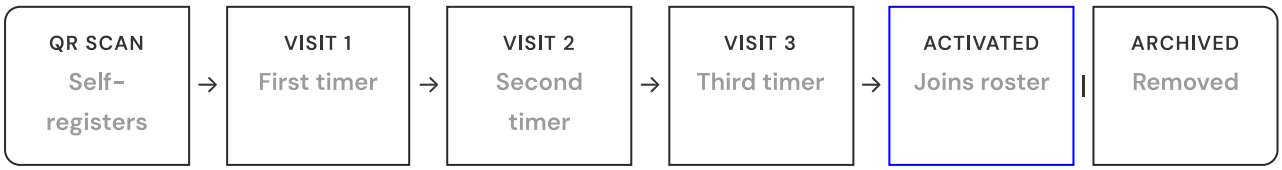

07 — CORE MODULES

Five modules, one application

1 New People Pipeline

Pastor + Leaders

Replaces the Boys/Girls NP Google Sheet. New visitors scan a QR code → fill in a simple registration form → details feed directly into the system. No Google Form, no manual copying. Pastor assigns leader. Leaders can also manually add as a fallback, and can reassign if needed.

FIELDS

- Name, phone, school, year level, gender
- Who brought them (friend)
- 1st, 2nd, 3rd visit dates
- Edit / override any field at any time
- Parent name and phone
- Leader allocation (pastor assigns; leader can reassign)
- Catch-up logged (meaningful connection)
- Activation → auto-added to leader's roster as Community

NC FIELDS (WHEN APPLICABLE — SAME RECORD)

- Is new Christian flag
- Water baptism date
- Fresh Start started / completed
- Decision date + type (First Time / Rededication)
- Bible given
- NC leader assigned

2 Leader Portal

Leaders

Mobile-first. Leaders see only what's theirs. Their roster is pre-loaded by the pastor — leaders open the page and their young people are already there. The live year/gender breakdown is pastor-only.

WEEKLY ENTRY

- Youth roster — pre-loaded, shows category + care milestones
- Live breakdown by year and gender (pastor only)
- Expected attendance — Yes / Maybe / No with reason
- My history (past submissions)

PASTORAL CARE (ANY TIME)

- Update water baptism / HS baptism / serving per youth
- View my allocated new Christians
- View my allocated new people
- Can manually add NP/NC as fallback

END OF TERM (WHEN PASTOR OPENS REVIEW)

- Auto term stats (read-only)
- NP connection status per new person
- Category + pastoral comment per youth
- NC step updates per new Christian

3 NC Discipleship Pathway

Pastor + Leaders

For roster youth who make a decision outside the NP pipeline (e.g. a regular attendee makes a first-time decision). Gets their own record linked to their roster entry. If someone is also a new person, NC fields live on the NP record — no separate entry needed.

- Name + decision date
- Leader assigned (pastor assigns; leader can reassign)
- Bible given date
- Linked to youth roster record
- Decision type: First Time / Rededication
- Water baptism date
- Fresh Start started / completed
- Notes

4 Pastor Weekly Entry

Pastors

Campus-level life metrics, once per week after youth night. One number from Planning Centre, everything else computed or entered here.

- Actual attendance (from Planning Centre)
- 1st, 2nd, 3rd timers
- Bibles given, Fresh Start / NC course
- Youth Connect, Sunday, Saints attendance
- Total in department, total leaders
- First-time decisions, rededications
- Water baptisms, HS baptisms
- Schools visited, no youth night flag

5 Stats Dashboard

Pastors

Replaces the combined state spreadsheet. Auto-computed from all submissions. Pastors also manage campus setup from here.

- Campus health snapshot
- Key health stats table by week
- Category distribution (Contributor / Connected / Community)
- NC step completion rates
- Leader submission status (who's missing)
- Year-on-year comparison
- NP connection rate per term
- Discipleship milestone stats (baptism %, serving

%)

- Year level and gender breakdown (pastor only)
- Open / close term review
- Manage leaders + rosters
- Term review collated results

★ = new or changed since v1

08 — DATA MODEL

Supabase schema — 9 tables

campuses — 7 ministry campuses

`id` `name` `slug` `archived`

leaders — Leaders and pastors per campus

`id` `campus_id` `name` `role` `active`

youth_roster — Youth per leader — includes care sheet + category

`id` `leader_id` `campus_id` `name` `year_level` `gender` `category` `water_baptised` `water_baptism_date` `hs_baptised` `hs_baptism_date` `serving` `serving_role` `pastoral_notes` `last_reviewed_term` `active`

new_people — Visitor pipeline — NC fields included when applicable

`id` `campus_id` `leader_id` `name` `phone` `school` `year_level` `gender` `parent_name` `parent_phone` `friend` `visit_1_date` `visit_2_date` `visit_3_date` `catchup_done` `status` `connection_status` `activated_date` `archived_reason` `notes` `is_new_christian` `decision_date` `decision_type` `nc_leader_id` `baptism_done` `baptism_date` `bible_given` `fresh_start_started` `fresh_start_completed`

new_christians — NC records for roster youth (not in NP pipeline)

`id` `campus_id` `leader_id` `youth_roster_id` `name` `decision_date` `decision_type` `baptism_done` `baptism_date` `bible_given` `fresh_start_started` `fresh_start_completed` `notes` `archived`

leader_entries — Weekly expected attendance per leader

`id` `leader_id` `campus_id` `entry_date` `term` `week_number` `attendance_listing` `sunday_attendance` `connect_attendance`

weekly_stats — Campus-level weekly life metrics

`id` `campus_id` `entry_date` `term` `attendance` `first_timers` `second_timers` `third_timers` `salvations_first` `salvations_rededs` `bibles_given` `fresh_start` `water_baptisms` `hs_baptisms` `schools_visited` `connect_attendance` `sunday_attendance` `saints_attendance` `no_youth_night` `notes`

term_reviews — Tracks open/closed state of end-of-term review periods

`id` `campus_id` `term` `year` `opened_at` `closed_at`

faith_goals — Per-campus annual targets

`id` `campus_id` `year` `metric_key` `goal_value`

Blue = primary key · Orange = foreign key · Green = new field

09 — ARCHITECTURE

Simple, deployable, maintainable

FRONTEND

Vanilla HTML/CSS/JS

Multi-page. Shared shared.js + shared.css. No npm, no build step, no framework. Claude writes every file.

BACKEND + DATABASE

Supabase

PostgreSQL, REST API called directly from the browser. Already in use.

AUTHENTICATION

Campus + name select

No login. Pick campus, pick name. Everything personalises from there. Term reviews appear automatically when the pastor opens the review period.

VERSION CONTROL

GitHub

Every change is saved with full history. Can roll back to any previous version. Claude updates files → GitHub Desktop: Commit → Push. Two clicks.

HOSTING

Netlify

Connected to GitHub. Auto-deploys on every push — no drag and drop. Stable URL for QR codes and leader bookmarks. Free tier sufficient.

UPDATES

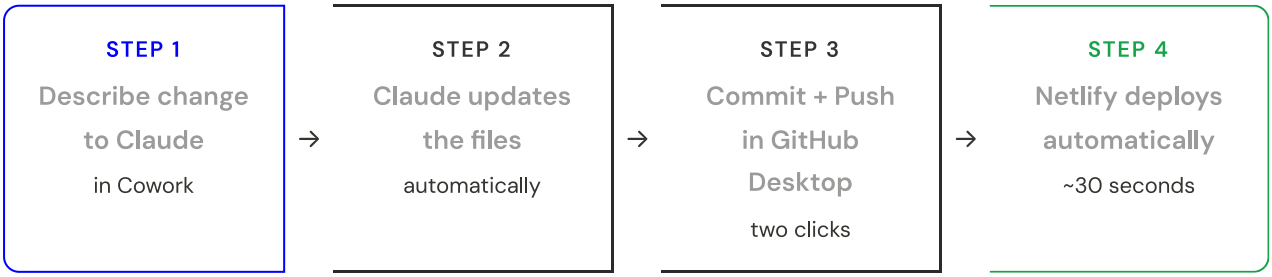

Cowork → GitHub → live

Describe the change to Claude in Cowork → files update → open GitHub Desktop → Commit → Push → Netlify deploys in ~30 seconds. No code knowledge needed.

11 — V1 SCOPE

What we build first, what comes later

FEATURE	WHEN	NOTES
Campus + name select (no login)	V1	Simple identity for all users
Leader portal — expected attendance	V1	Yes / Maybe / No per youth, with reason
Youth roster with categories + care sheet	V1	Contributor / Connected / Community / Archived, water baptism, HS baptism, serving
QR registration form	V1	Public page, feeds directly into new_people table
NP pipeline — full CRM	V1	Manual entry, edit/override, visits, catch-up, activation
NC fields on NP record	V1	When NP also made a decision — same record
NC discipleship pathway	V1	Standalone records for roster youth who decide
Leader + pastor can input and reassign NP/NC	V1	Pastor primary, leader as fallback
Term review — open/close by pastor	V1	Appears in leader portal automatically
Term review — auto stats per leader	V1	NP added, attendance avg, expected avg, rate, roster change
Term review — pastoral category + comment	V1	Leader fills in per youth
Pastor weekly stats entry	V1	All life metrics
Stats dashboard (campus view)	V1	Snapshot, health stats table, category distribution
Manage leaders and youth rosters	V1	Pastor builds each leader's roster
Year/gender breakdown (pastor only)	V1	Not shown to leaders
Year-on-year comparison charts	V2	Term and year comparisons
Faith goals	V2	Per-campus annual targets vs actuals
Planning Centre integration	V2	Pull attendance via API
PDF / export	V2	Export stats, rosters, or term reports

12 — PROFESSIONAL ASSESSMENT

What's genuinely missing, and what could be tidier

Ten things worth addressing — either now or in V2. Listed in order of impact.

ADDRESS NOW **Absence flag — the silent gap**

✓ Confirmed. A youth marked "No" three or more consecutive weeks represents a pastoral concern the system should surface. A visual indicator on the roster — "not expected for 3+ weeks" — gives leaders a weekly pastoral prompt without any extra input. Low effort, high pastoral value. Will be built into the roster view.

ADDRESS NOW **Duplicate detection with merge**

✓ Confirmed. When a new person is added (QR or manual), the system checks for a matching name + phone number and flags a warning before creating a second record. If a duplicate is confirmed, the pastor can review both records side-by-side and merge them into one — keeping the most complete data — then remove the duplicate. No data is lost in the merge.

ADDRESS NOW **Activation flow**

✓ Confirmed. After the 3rd visit is logged, the person is flagged "ready to activate." Pastor confirms with one click. On activation: they instantly join the leader's roster as **Community**. The leader can change their category at any time — including immediately. The NP leader becomes their roster leader automatically; pastor can reassign after.

ADDRESS NOW **Term roster change — week 1 vs final week**

✓ Confirmed. Roster change is computed from the attendance listing in week 1 of the term vs the final week — not a manual snapshot. The system counts youth listed in each leader's first entry of the term and their last, and shows the difference. This means no snapshot needed at review-open time; it's always computed from the actual entry data.

ADDRESS NOW **Campus-specific QR codes + manual NP entry**

✓ Confirmed. Each campus gets its own QR code, generated from the admin dashboard, pre-selecting that campus on the registration form. Additionally, pastors and leaders can manually enter a new person directly onto the NP database via a form on the new-people page — for cases where QR wasn't used or details need to be entered after the fact.

ADDRESS NOW **New assignment awareness**

Since there are no email links or push notifications, a leader only knows they've been assigned a new person if they happen to check the portal. A "pending" badge on their home screen — "2 new people assigned" — solves this immediately. Visible the moment they log in, cleared when they've viewed those records. No notifications needed.

ADDRESS NOW **Serving → Contributor auto-update**

✓ Confirmed. When a leader marks a youth as "Serving = Yes" on their care sheet, their category automatically updates to Contributor. If serving is later removed, the category does not auto-downgrade — the leader sets it manually from that point. This keeps the Contributor category meaningful and self-maintaining.

TIDY UP **New person "first contact" step**

The pipeline goes QR scan → visit 1 → visit 2 → visit 3. But in practice a leader reaches out before the new person returns for visit 2. A simple "initial contact made" checkbox — like catch-up but earlier in the flow — captures this step without complexity. Helps leaders see who hasn't been contacted yet.

ADDRESS NOW **No-youth-night weeks and leader entries**

✓ Confirmed. When the pastor marks "no youth night" for a week, the leader entry form for that week is suppressed and those weeks are excluded from term averages (attendance rate, expected average, etc.). This keeps the stats honest.

TIDY UP **Historical data migration**

When the system goes live, existing NP, NC, and roster data needs to move across from Google Sheets. Options: a simple import tool (Claude can build this as a one-off), or a clean cutover date after which old sheets are reference-only and everything new enters this system. Don't go live with an empty database — leaders will lose confidence immediately.

13 — DECISIONS LOG

All 19 decisions resolved

✓ Resolved

Authentication

Campus + name select. No login, no magic links, no tokens.

✓ Resolved

Roles

Two only — Youth Leader and Youth Pastor. No state-level role.

✓ Resolved

QR registration

Custom register.html feeds directly into new_people table. Google Form removed entirely.

✓ Resolved

NP + NC overlap

One record. NC fields added to the NP record when applicable. Standalone NC table only for non-pipeline roster youth.

✓ Resolved

Who assigns NP + NC leaders

Pastor is primary. Leaders can also manually add and reassign as a fallback.

✓ Resolved

Youth health categories

Four: Contributor, Connected, Community, Archived. New activations default to Community.

✓ Resolved

Year/gender breakdown visibility

Pastor-only. Not shown in the leader portal.

✓ Resolved

End-of-term report access

No unique URLs per leader. Reviews appear in the leader's normal portal when pastor opens the term review period.

✓ Resolved

Roster pre-loading

Pastor builds each leader's roster. Leaders open their page and their young people are already there.

✓ Resolved

Absence flagging

Youth marked "No" for 3+ consecutive weeks gets a visual flag on the roster. Built into the leader portal.

✓ Resolved

Duplicate prevention

System checks name + phone on add. Flags duplicate, offers side-by-side merge, removes the duplicate record.

✓ Resolved

Activation trigger

After 3rd visit: system flags "ready to activate." Pastor confirms with one click. Instantly joins roster as Community. Leader can change category immediately.

✓ Resolved

Term roster change calculation

Computed from attendance listing: week 1 of term vs final week of term. No snapshot required — derived

from entry data.

✓ Resolved

Campus QR codes + manual NP entry

One QR per campus (admin dashboard generates it), pre-selects campus on the form. Manual entry form also available on the NP page for pastors and leaders.

✓ Resolved

Serving → auto-updates to Contributor

When serving is ticked Yes, category auto-updates to Contributor. Removing serving does not auto-downgrade — leader sets category manually from that point.

✓ Resolved

No-youth-night weeks

Suppresses leader entry form for that week. Excludes week from all term averages and rate calculations.

14 — NEXT STEPS

Ready to build — in this order

✓ **GitHub repo created**

dreamers-youth repository set up. GitHub Desktop installed and connected.

1 **Connect Netlify to GitHub**

Go to netlify.com → New site → Import from GitHub → select dreamers-youth. Auto-deploy is active from this point.

2 **Supabase schema — all 9 tables**

Claude writes the complete SQL here in Cowork. One paste into the Supabase SQL editor. Done once.

3 **shared.js + shared.css**

Supabase client, identity helpers (campus/name select), design tokens, common components. Every other page imports these.

4 **index.html — campus + name select**

The entry point. Routes to leader.html or dashboard.html based on role.

5 **register.html — QR registration form**

Public page. New visitor fills in their details. Feeds directly to new_people table. Generate campus

QR codes from admin.

6 **leader.html — leader portal**

Roster, expected attendance, pastoral care sheet, new people view, term review section.

7 **new-people.html + new-christians.html**

NP pipeline CRM and NC discipleship pathway for pastors.

8 **dashboard.html — stats + setup**

Weekly entry, health stats, manage leaders/rosters, term management, collated results.

9 **Pilot with one campus**

Push to GitHub → Netlify deploys → share URL with one campus for real testing. Then roll out state-wide.
